OBJECTIVE

MCA graduate with a strong foundation in Java, Python, SQL, data structures, algorithms and software development, along with practical experience gained through internships and academic projects. Seeking an entry-level opportunity to apply programming, analytical, and problem-solving skills to develop reliable technology solutions, learn new technologies and contribute effectively to collaborative engineering teams.

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026

JSS Academy of Technical Education

CGPA: 9.60 / 10.0

Bachelor of Science (B.Sc)

2021 – 2024

B. M. S. College for Women

CGPA: 9.39 / 10.0

RELEVANT COURSEWORK :

- Python
- Java
- C
- Data Structures
- Database Management
- Artificial Intelligence
- Machine Learning
- Web Technology

TECHNICAL SKILLS

Languages: Java (8), Python (3.x), C (C11)

Data Analytics: Data Analysis, Data Cleaning, Data Processing, Data Validation, Data Visualization, Pandas, NumPy, Power BI, Excel

Databases: MySQL, Oracle SQL, SQLite, Database Management System(DBMS), Data Modeling

Core Computer Science: Data Structures, Algorithms, Object-Oriented Programming (OOP), Database Management (DBMS), Software Development Life Cycle (SDLC), Problem Solving, Software Development

Web Technologies: HTML, CSS, JavaScript, Flask, AngularJS

Frameworks/Libraries: Scikit-learn, Matplotlib, Plotly, Bootstrap, InceptionV3

Tools: GitHub, VS Code, Eclipse, IntelliJ Idea

EXPERIENCE

Global Logica Software Technologies - Basaveshwara Nagar, Bengaluru

Feb 2026 - May 2026

Role : Software Intern, Project: AI Powered eCommerce Marketplace with Intelligent Data Optimization

- Handled end-to-end product lifecycle tasks including 100+ product initialization, SKU generation for 60+ products and inventory management, ensuring accurate and efficient product listing operations.
- Performed product testing for 1000+ products using an in-house Python-based application, identifying issues and supporting quality improvement of internal tools and processes.
- Worked as a part of team to develop a scraping tool named Cart Crawler. Details regarding the project has been mentioned in project section.

Merida Tech Minds - Jayanagar, Bengaluru

Feb 2024 - Mar 2024

Role : Python Intern

- Completed a Python internship gaining hands-on experience in real-world programming applications.
- Contributed to a team-based system design project, focusing on logic building and database interaction.

PROJECTS

Cart Crawler - Internship Project | *Python, Playwright, Regular Expressions, Pandas*

Feb 2026 - May 2026

- Worked as part of a team to develop Cart Crawler, an internal automation tool for real-time web scraping and product data extraction from an e-commerce admin dashboard.
- Implemented browser automation features including automated login, page navigation, pagination handling, and extraction of product details and Product Code information.
- Improved operational efficiency by automating repetitive data collection processes and generating structured Excel reports, reducing manual effort and increasing data accuracy.

Deep Learning based Ovarian Cancer Prediction using Histopathology | *Flask, OpenCV, InceptionV3, Grad-CAM*

Sep 2025 - Jan 2026

- Developed a deep learning-based ovarian cancer prediction system using histopathology images by training InceptionV3 model and used techniques such as Grad Cam for highlighting the important areas, focusing on accurate feature extraction, image preprocessing, and classification to support early and reliable diagnosis.
- Evaluated the model pipeline with performance optimization and validation techniques, ensuring scalability, robustness, and potential integration into real-world clinical decision-support systems.

Image Processing Web Application | *Flask, OpenCV, Bootstrap, Numpy*

Jun 2025

- Built a real-time image processing web application using Flask, OpenCV, and JavaScript, enabling webcam capture and multiple image transformations.
- Implemented backend processing and interactive UI features including file upload, live preview, and downloadable outputs for enhanced user experience.

Employee Management System | *Python, Tkinter, SQLite*

Feb 2025

- Designed and developed a desktop-based Employee Management System using Python and Tkinter, implementing secure CRUD operations with integrated database support.
- Built a user-friendly interface with efficient data handling, enabling streamlined employee record management, search functionality, and real-time updates.

COURSES & CERTIFICATIONS

Data Analytics Job Simulation - Deloitte

July 2026

Completed Deloitte's Data Analytics and Forensic Technology job simulation, creating interactive Tableau dashboards and using Excel for data classification, analysis, and business insights.

Web Development Fundamentals – IBM Skill Build

July 2025

Developed a strong foundation in HTML, CSS, and JavaScript, gaining practical skills in designing responsive web pages, styling user interfaces, and implementing interactive features for user-friendly web applications.

Introduction to Data Science – Cisco Networking Academy

Oct 2023

Learning to process, analyze, and visualize data using real-world datasets. Applied statistical and analytical methods to draw actionable business insights from data

Introduction to Machine Learning - VOIS

June 2025

Gained practical knowledge of supervised and unsupervised machine learning, applying classification and clustering techniques with data preprocessing, model evaluation, and actionable insight extraction.

EXTRACURRICULAR ACTIVITIES

1. Leadership:

i) Rotary Club Member

2017-2018

Participated in social service initiatives, organizing and contributing to community events that impacted local beneficiaries.

2. Volunteer:

i) Prathibotsava, BMSCW (Talent's Day)

2023-2024

Assisted in organizing and managing events, ensuring smooth execution and active participation throughout the event.
